

Swinford Wind Farm

Vattenfall is progressing two wind farm projects in East Anglia, known as Chatteris Wind Farm and Redmere Wind Farm. Both of these projects are classed as Nationally Significant Infrastructure Projects (NSIPs).

Chatteris Wind Farm	Up to 15 turbines (max tip height 220m), 126MW
Redmere Wind Farm	Up to 32 turbines (max tip height 220m), 303MW

As the projects are at an early stage of development, detailed design information is not yet available. However, we are keen to engage with local communities and stakeholders to introduce the projects and gather feedback that can help inform the design of the development.

Local drop-in events

We are holding three drop-in events to start this conversation. We will introduce both projects and share information about the studies and assessments being carried out in the local area, including maps and information brochures.

As well as the drop in events, a feedback form will be available on our website between 13th October and 9th November. Further events will be held in early 2027, where more detailed information, including visualisations from specific viewpoints, will be available.

Tuesday 13th October, 4pm-8pm
→ **Feltwell Royal British Legion Hall**
6 Long Ln, Feltwell, Thetford, IP26 4BJ

Wednesday 14th October, 4pm-8pm
→ **Mepal Village Hall**
School Ln, Mepal, Ely, CB6 2AJ

Thursday 15th October, 4pm-8pm
→ **Littleport Leisure Community Centre**
Camel Road, Littleport, Ely, CB6 1EW
